Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on 08 March 2005.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-36 is/are pending in the application.
- 4a) Of the above claim(s) 31-36 is/are withdrawn from consideration.
- 5) ☒ Claim(s) 1-10 is/are allowed.
- 6) ☒ Claim(s) 11, 12 and 16-30 is/are rejected.
- 7) ☒ Claim(s) 13 and 14 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.

DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 23-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 23, what is meant by "the flat part"? Is there an antecedent for this? Also, "is comprises" is not clear.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11-12 and 16-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Oishi et al., 6,004,405. in view of Japan 2001-351835 and Japan 2001-118757.

With respect to claim 11, the cover figure of Oishi et al. shows a wafer having first and second principal sides (top and bottom). Each of these sides has a flat "bevel contour" at the edge of the wafer. At least one of the bevels has two types of ID marks (3 and 4), for encoding two types of information (abstract). It would have been obvious to form the ID marks as groups of dot as taught by the other two references, where 351835 teaches recessed dots, and 118757 teaches protruding dots. The two dot types

are reversed patterns of one another. As taught in these two references, each type of dot ensures visibility, which motivates the use of both types of dots, and the Oishi reference itself notes the need for two types of marks.

With respect to claim 12, Oishi shows marks 3 and 4 displaced from one another along the circumference, and mark 3 is taller than mark 4, so there is a thickness displacement as well. With respect to claim 16, the Oishi bevels are flat. With respect to claim 17, the patterns in the two secondary reference are formed by groups of "minute" dots. With respect to claim 18, it would have been obvious to optimize the thicknesses of any dots used in order to make sure that they will be visible. With respect to claim 19, reference 118757 shows in figure 14 a dot have a center protrusion, and a ring-shaped depression around the protrusion. With respect to claim 20, it would have been obvious to optimize dimensions for visibility, for example. With respect to claim 21, "second" is arbitrary. The limitations of the other claims parallel those discussed above, and would have been obvious for the same reasons.

Allowable Subject Matter

Claims 1-10 are allowed.

Claims 13-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
